

## Welcome to the Dephbokks Programming Section

### [The EZRL \(Easy Roguelike\) Library](#)

[ [EZRL Download](#) ] [ [EZRL Guide](#) ] [ [EZRL Documentation](#) ]

[ [New! - EZRL ver. 0.1.10 Download -- Microsoft Visual C++ 2010 Express Project](#) ]

This library is designed to allow a user create a roguelike game. It is based on SDL, so the user must link to SDL in order to build an EZRL application. Check out the screen shots below of a small sample game that was created with the library. Click on screen shots to enlarge.
